Search STIC Site

Search requests relating to published applications, patent families, and litigation can be made by filling out this form and clicking on "Send."

* indicates mandatory information.

* Tech Center:

☐ TC 1600 ☐ TC 1700 ☐ TC 2100 ☐ TC 2600 ☐ TC 2800
☐ TC 2900 ☒ TC 3600 ☐ TC 3700 ☐ Law Lib ☐ Other

Your Contact Information:

* Email Address:
(e.g., Susan.Smith@uspto.gov)

Mailbox No.:

* Case serial number:
If not related to a patent application, please enter NA here.

Class / Subclass(es)

Earliest Priority Filing Date:

Format preferred for results:

☒ Paper ☐ E-mail ☐ Diskette

Provide detailed information on your search topic:

- In your own words, describe in detail the concepts or subjects you want us to search.
- Include synonyms, keywords, and acronyms. Define terms that have special meaning.
- For Chemical Structure Searches Only
Include the elected species or structures, keywords, synonyms, acronyms, and chemical structure.
- For Sequence Searches Only
Include all pertinent information (parent, child, divisional, or issued patent number, sequence number, and accession number).
- For Foreign Patent Family Searches Only
Include the country name and patent number.
- Provide examples or give us relevant citations, authors, etc., if known.
- FAX or send the abstract, pertinent claims (not all of the claims), drawings, chemical structure, or branch library.

Enter your Search Topic Information below:

Voluntary Results Feedback Form

- I am an examiner in Workgroup: Example: 3620 (optional)
- Relevant prior art **found**, search results used as follows:
- ☐ 102 rejection
 - ☐ 103 rejection
 - ☐ Cited as being of interest.
 - ☐ Helped examiner better understand the invention.
 - ☐ Helped examiner better understand the state of the art in their technology.

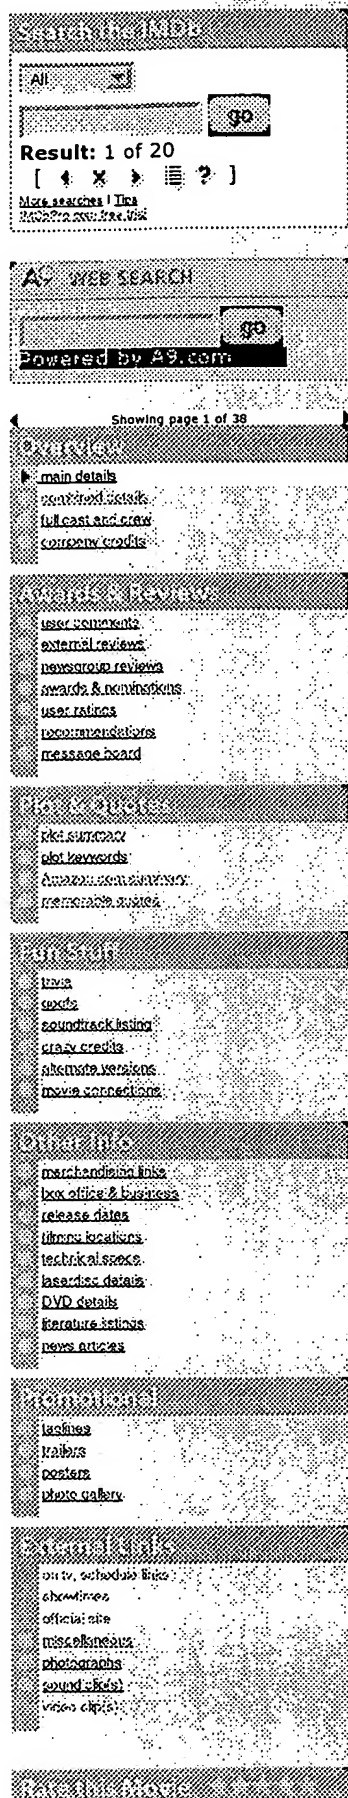

Types of relevant prior art found:

- ☐ Foreign Patent(s)
 - ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)
- Relevant prior art **not found**:
- ☐ Results verified the lack of relevant prior art (helped determine patentability).
 - ☐ Results were not useful in determining patentability or understanding the invention.

Goofs: Continuity: When Truman is in his office and tries to make a phone call to find out more about Sylvia, he is wearing a big silver ring (seen in many other scenes of the movie). But when he puts down the receiver and flips through the women magazine he isn't wearing a ring on either hand. ([more](#))

Quotes: **Meryl:** I made macaroni! ([more](#))

Awards: Nominated for 3 Oscars. Another 28 wins & 34 nominations ([more](#))

User Comments:

16 out of 16 people found the following comment useful:-

Lawn Mowing At Its Best, 10 July 2005

Author: [daveisit](#) from Melbourne, Australia

"The Truman Show" owes a lot to the direction of Peter Weir. Weir refuses to pump out the movies in a search for extra dollars. Instead he chooses wisely and directs brilliantly. Just by looking at a list of his movies will surprise and even amaze you. So as you would imagine "The Truman Show" is another success.

Truman Burbank has the perfect life, or so he thought until finally his life long suspicions about his world begin to unravel. Even though the idea for Truman is not totally original, it is thought provoking enough and allows the audience to wonder, what if? If you think this couldn't happen, just look back over the years at the stupidity of the human race and think again.

Jim Carrey once again nails his role, as do the entire cast. It is rare he fails to perform at a level that perfectly complements the movie and its genre. This is something he does not receive enough credit for. Acting for a comical role or a more dramatic role requires no less effort for the performance to be spot on.

>With the recent release of Ratings on TV, do people really want to
>have a completely unsupervised/uncensored outlet available on their
>television sets? I mean, people already have trouble keeping their
>kids away from Bevis and Butt-head.

There is software out there that can take care of this. Perhaps ViScorp
could incorporate it or create their own version of it. OR perhaps they
could incorporate the V-chip into their devices and eventually have web
pages rated as well.

>Then you consider exactly who wants to go on the web. Does your usual
>TV Junkie want to browse the web? I don't think so. Right now, it's
>mostly computer types. The Web is far to slow to keep the interest
>people who constantly flick the channel.

There is a new device coming out now called "WebSync" - pretty much
similar to the above but during certain portions of a TV show etc.. a web
page will be highlighted on screen.. you can click on this and go to it
and find out what they are talking about in the program or get more info
on it etc.

>Why are they pushing WebTV? Well, so they can push on-line sales. I
>guess, they think some of us are too lazy to watch the "Home Shopping
>Network" and go through the labors of dialing a telephone to order
>something. They are trying to get us to be able to buy it as we watch
>it! Simple, clean, commerce.

Yes, this is another major advantage.

>Do people really want this? Well, apparently not.

Just not yet. There is still confusion over the whole web thing to people
not used to it and even more confusion over the devices such as WebTV to
access it.

Not long ago I posted a message similar-looking to this and got flamed = for spamming the newsgroup. Spam is not judged by messages' colors. I = wanted an opinion on my point of view about where Microsoft is taking = Internet Explorer and wondered if anybody knew anything. (I still want = the gossip..:~) Please spare me the hate mail on this one. =

Interact-Net E-zine is nothing, just a cheezy web site and a logo I = throw in my messages every once in a while when I'm in the mood. =

Thanks.

I heard on Letterman last night that Gates was thinking of buying out = CBS. Is this true?

If it is, it says a lot: Microsoft wants to make Internet Explorer a **TV** = browser, as well as an Internet browser. That's scary. I mean, in a = cool way. Any opinions? Is the rumor a lie?

Does ANYONE know if Microsoft's future = web-browsing-off-the-VBI-TV-signal will continue to be an InterCast = technology, or does Microsoft plan on overlapping the HTML over the **TV** = picture? Anyone? I am dying to know. I must know. I'm getting sick, = I'm gonna puke.. bluggghghhhhhh...=20

If Microsoft goes in the Interact direction, then Internet Explorer =
 would have a special function to let you view the TV picture in one =
 frame (i.e. upper-left), have a list of hyperlinks on another frame =
 (i.e. upper-right), and have the web pages for those hyperlinks in =
 another frame (i.e. bottom-half). These web pages would be downloaded =
 from the TV station as you watch the TV, via the VBI.

If, however, Microsoft also included the technology to overlap the TV =
 picture with HTML, the entire TV environment would immediately become =
 true interactive television. "Call 1-800-11BORED for more information" =
 would be replaced with "Click on the little icon at the bottom of your =
 screen for more information," taking you to a web site. That would be =
 first-generation technology, to say nothing of utilizing multicast IP =
 and other forthcoming technologies where this would be useful.

But to answer your question, the browser to be used for this technology =
 is slated for IE 4.0 and especially IE 5.0.

Sincerely,

Jon Davis

Sure I did. I learned that there are too many panzies on the Internet who think that making a message look anything different than black ASCII on a white background is sin, I mean spam.

I have a newfound sincere hatred against antispammers that whine about legitimate posts that just happen to be laid-out a bit more creatively.

Sincerely,

Jon Davis

Don't think that's a real bad problem. This is an IE4 NG and I checked =
 the properties on many people. Most of them use either OE or IN or =
 Netscape News(or whatever it's called. Is it Collabra?)

Integration of TV and the web is a given, but I expect we will be well past IE4 by that time.

Actually, expect part of it in a couple weeks.

Sincerely,

Jon Davis

Chip Ciammaichella wrote in article ...

Integration of TV and the web is a given, but I expect we will be well past IE4 by that time. You know, all of us are not against the off-subject post from time to time, we enjoy a little humor, a neat bit of information, a little tit-for-tat, but lately the MSIE newsgroups are becoming more like Usenet...more junk than info. Have you noticed all the porno-spam and marketing crap here lately? I have no problem with what your posts look like, Jon, as long as they are a reasonable file size. I appreciate creativity as much as anyone. But in addition to the increased amount of spam and crap in this NG, some of you newer, younger, posters have made this NG seem like the college dorm chat-room. I know that you want to show us all how smart you are, but please at least stick to the subject of the newsgroup a little more. I respect your need to showcase your talent, so please respect the needs of some of us for a quality NG that contains a lot of good info, without the crap. The "big-dogs" of this NG (I'm not saying I'm one of them) tend to post on-subject, to the point, and with class. If you can't run with the big dogs, stay on the porch. There, I've spoke my peace enough for one night.=20

"A journey of ten thousand miles begins with one small step."

Jon Davis wrote in article ...

If Microsoft goes in the InterCast direction, then Internet Explorer would have a special function to let you view the TV picture in one frame (i.e. upper-left), have a list of hyperlinks on another frame (i.e. upper-right), and have the web pages for those hyperlinks in another frame (i.e. bottom-half). These web pages would be downloaded from the TV station as you watch the TV, via the VBI.

If, however, Microsoft also included the technology to overlap the TV picture with HTML, the entire TV environment would immediately become true interactive television. "Call 1-800-11BORED for more information" would be replaced with "Click on the little icon at the bottom of your screen for more information," taking you to a web site. That would be first-generation technology, to say nothing of utilizing multicast IP and other forthcoming technologies where this would be useful.

But to answer your question, the browser to be used for this technology is slated for IE 4.0 and especially IE 5.0.

Sincerely,

Jon Davis

Inventor: **INOKUCHI T ...**

... SAKO Y ...

... SAKURAI K ...

... TORIYAMA M

Abstract (Basic):

... **Broadcast program** data and at least information concerning at least an article of consumer goods appearing in a **broadcast program** included in the **broadcast program** data are synchronously transmitted and received. The received **broadcast program** is reproduced and displayed on a display unit. Information concerning an article of consumer goods **selected** from the articles of consumer goods displayed on the display unit is taken out and displayed. With reference to the related information, a **viewer** can purchase an article of consumer goods from a shop.

International Patent Class (Main): **G06F-017/60** ...

ABSTRACT

PROBLEM TO BE SOLVED: To **buy** an article appearing in a program while watching the program without any disturbance to the **watching** of the **program** .

SOLUTION: Provided is environment wherein information **specifying objects** (a), (b), (c), etc., appearing in the program which can be watched through equipment 301...

... to correspond to each other to provide the unique information made to correspond to the **stored** and held information specifying the objects and environment wherein the intention to **buy** a desired object according to the unique information is indicated is provided, thereby accepting the **purchase** intention indication. Consequently, the viewer **indicates** the desired **objects** (a), (b), (c), etc., while **viewing** the **program** and can examine the **purchase** of the objects (a), (b), (c), etc., and **purchases** them thereafter.

...TEXT: public eye."

For Viacom's Haas, inventory management is more science than speculation. Nickelodeon's TV properties, he said, allow for more testing opportunities than titles launched at movie theaters, which generally have smaller windows. His strategy for a new property: start with a limited selection of products that are eminently sellable, like T-shirts, then expand the line if they do well. Nick's stores will also serve as labs that test a property's strength before national licenses are ...

NOTES FROM THE ROBERTSON STEPHENS TECHNOLOGY CONFERENCE

S&P's Emerging & Special Situations, Vol. 16, No. 3, Pg 3

March 18, 1996

JOURNAL CODE: ESS

SECTION HEADING: SEGMENT DISCUSSION ISSN: 0882-5440

WORD COUNT: 2,855

TEXT:

...Upon Us

The Internet is definitely for real. With protocols established and high speed data, **video** and audio digital pipelines being rapidly put in place, the Internet will dramatically alter how corporations do business and how individuals **purchase** products and services. By 1997, at least some Americans will be able to mix the delivery of **television** and computer information via cable modem, by fiber optic cable to the neighborhood and then...

... a sales representative while visually inspecting products, transact business, look at account information, download a **movie** for later **viewing** or videoconference with business associates. One way or the other, the information pipeline is going...

... local loop to accommodate two way communication and transfer of data, voice and graphics, including **video**. By combining the delivery of **television** entertainment channels with information needs it will cost less money in today's dollars than your phone and cable **television** bill totals today. And with manufacturers selling direct to the consumer, prices will drop and in many places, **product selection** will become equal to what can be found in only the largest metropolitan areas today...

...most bear in mind is that Internet development now is about at the level of **television** in the 1950s, **small screens**, just two or three channels and black and white images. Progress will occur much faster than with **television**, but it will take two to three years for the infrastructure to be put in...

...Tate's dBase for years, Microsoft in 1992 acquired Fox Software, whose FoxPro ran dBase **programs** faster than dBase ran them. Microsoft markets Access, a simpler data base, with its Office...

...Based on 1997 dollar sales: 5%

MULTIMEDIA

WHAT IT IS -- Software that enables audio and **video** content on computers.

WHAT HAPPENED -- Microsoft is pushing hard into the market for "**streaming**" technologies that enable sound and **video** over the Web. Its complete multimedia product, Netshow, requires Web sites to use Windows NT server software. A less ambitious effort, Windows **Media** Player, aggregates the audio and **video** products of other companies. Microsoft bought one competitor, Xtreme, and invested in Real Networks and...

...Introduced its personal finance software, Microsoft Money, in 1991 and four years later tried to **buy** its major competitor, Intuit, which produces the industry-leading Quicken financial software. The Intuit deal ...

...1997 dollar sales: 31%

(Sources: Dataquest; International Data Corporation; Jupiter Communications; PC Data; Zona Research; **Media** Metrix)(pg. C6, C7)

Chart: "World Wide Words: A Glossary"

Eighteen terms essential to make sense of today's computer environment.

APPLICATION -- A computer **program** designed for a specific task or use, like word processing, accounting or missile guidance.

BROWSER -- A **program** that enables users to navigate the World Wide Web, interact with other **programs** and users on the Internet, and call up and display multimedia files.

BUNDLING -- A marketing...

...like the top of a desk. Popularized by the Apple Macintosh and then by Microsoft **Windows**.

ICON -- A **small image** that represents a file, **program** or location on the Internet.

INFORMATION TECHNOLOGY -- The use of computers to call up, share, **store** or manipulate text, images or sound.

INTERNET -- A decentralized collection of networks that connects dissimilar ...

...Internet is the platform for E-mail, the World Wide Web, file transfers and chat **programs** , among other technologies.

JAVA -- A computer language developed by Sun Microsystems that produces **programs** that run on almost any computer or operating system. Its compatibility and ease of use...

...America Online, Compuserve and Microsoft Network.

OPERATING SYSTEM -- The software that allows users and application **programs** to interact with and control a computer or microprocessor. Examples include Mac OS, Windows and Unix.

PLATFORM -- A fundamental layer of software required to make other **programs** run. The word is used interchangeably with operating system, which is the most common type...

...platform. The Internet is another, and local networks, Web browsers and Java are all frequently **viewed** as platforms.

SOLUTION -- Now a faddish synonym for application **program** , it originally meant a combination of two or more **programs** used to solve a business problem.

UNIX -- A powerful operating system especially suited for servers...

...s microprocessors; Windows NT, which is generally found on more powerful Unix-class machines, and **Windows** CE, for **small** electronic devices.

WINTEL -- A term for the combination of Windows operating systems and Intel microprocessors...
...computers sold today.

WORLD WIDE WEB -- A vast, disparate network of pages of data and **programs** on the Internet, connected to one another via hyperlinks -- a technology that lets users jump from one **item** to another by **clicking** with a mouse on a word or icon that points to some other part of...

Folder is empty.

No results were found for your search query.

You may want to try your search again after following one or more of these tips:

- Check the spelling of your search terms. Correct any misspellings and re-run the search.
- To broaden your search, use the Boolean operator OR. For example, type: Siamese OR cats.

See [hints](#) for suggestions.
